Fixing Summary -

Location: **Head Track, Base Track & Wall Abutment**Use suitable fixings installed at 600mm centers to secure deflection channel.

Offset the centers and fix timber infill in position using Min 76mm screw. Locate the deflection head around channel. Secure screws through the section into the timber to maintain a Nominal 25mm gap. Use Drill Jig if necessary for pilot bores. Remove the screws as the build progresses to allow deflection assembly to work freely.

Location: Tapeable Conversion Secure section at 600mm centers using Min 20mm countersunk screw.

Sections secured at 600mm centers, see detail for fixings. Floor plates fitted to frame jambs using Min 25mm countersunk screw.

*STUD NOTE - Ensure the correct stud size is selected when building 100mm single or double skin walls. For single skin use 75mm and for double, 50mm.
