

SUSTAINABILITY STRATEGY 2023-2024

Prepared by
Shaun Gale

Last updated
August 2023

The Sustainable Development Goals are a set of 17 universal global goals, adopted by all UN Member States in September 2015 as part of the 2030 Agenda for Sustainable Development.

Fusion Partitions Sustainability Strategy

PEOPLE

We believe that our success is due to a team effort. A team formed from our employees, supply chain and customers.

Fusion always ensures all employees are treated and valued equally and we actively promote fairness, inclusion and respect.

By using our success to benefit others, this fosters a culture that spreads throughout our communities.

The health and wellbeing of our employees is paramount and we continue to invest in ensuring their place of work is a safe and healthy place to work in.

PLANET

In order to define, track and manage the processes and activities used in the operation of our business, Fusion implements and maintains an environmental management system that conforms with ISO 14001:2015.

Through both the creative design of each of our products and the analysis of the interface between our supply chain and our customers, we aim to continuously improve the environmental performance of our operations.

We are developing a carbon reduction plan by identifying sources of carbon emissions and introducing carbon footprint tracking.

PARTNERSHIPS

At Fusion we maximise the synergies of our supply chain and customer partnerships.

We are focused on minimising the impact of our activities on the planet and trading ethically within our industry.

Now more than ever we need to give consideration to sustainability within our partnerships.

Expires 1st September 2024
